

TOUR & TRAVEL MANAGEMENT SYSTEM

Database Project Report

This project is a Tour & Travel Management System developed using MySQL. It manages customers, bookings, tour packages, hotels, transport and payments.

SQL Implementation (Sample)

```
CREATE DATABASE TourAndTravelDB;
USE TourAndTravelDB;

CREATE TABLE Users (
    UserID INT AUTO_INCREMENT PRIMARY KEY,
    FullName VARCHAR(100),
    Username VARCHAR(50),
    Password VARCHAR(100),
    Role ENUM('Admin', 'Staff')
);

CREATE TABLE Customers (
    CustomerID INT AUTO_INCREMENT PRIMARY KEY,
    FullName VARCHAR(100),
    Phone VARCHAR(15),
    Email VARCHAR(100),
    CNIC VARCHAR(15),
    Address VARCHAR(255),
    Gender ENUM('Male', 'Female')
);

CREATE TABLE Bookings (
    BookingID INT AUTO_INCREMENT PRIMARY KEY,
    CustomerID INT,
    PackageID INT,
    SeatsBooked INT,
    TotalPrice DECIMAL(10,2),
    Status ENUM('Confirmed', 'Cancelled', 'Pending')
);
```

This database system demonstrates proper use of tables, relationships, procedures, views and triggers in MySQL. It is suitable for academic purposes.
